

ONLINE CHILD DEVELOPMENT RESEARCH FOR 3-7 YEAR OLDS

The **Child Online Research Activities Lab (CORAL)** at the University of Waterloo conducts studies with families over Zoom video chat, so you and your child can easily participate from the comfort of your home!

WHAT WE STUDY

We explore how children learn about the world around them. Some of the topics we study include how children respond to the social world, how children learn new concepts, and how language influences children's inferences.

PARTICIPATING ONLINE IS EASY

- Sign-up using the QR code or link below
- We email you with more information
- Select your 25-minute appointment when it's best for you
- Receive a Zoom link via email
- At your appointment time, click the link and connect with us
- We share our screen so your child can play our games and answer our questions
- Get entered in a draw for a \$50 Amazon giftcard
