

McGill Third Century (M3C) Postdoctoral Research Fellowships

McGill University is delighted to announce our **2024-2025 call for applications** for the McGill Third Century (M3C) Postdoctoral Research Fellowships.

Presently entering its third year, the M3C Fellowship Program reflects McGill's commitment to recruit and train exceptional emerging scholars from all disciplines, identities, and lived experiences. The Program pursues two principal objectives:

1. It contributes to the development of **a pipeline of emerging scholars** who are **members of equity-deserving groups**. Selected M3C fellows are promising prospective candidates for tenure-track positions at McGill or elsewhere following completion of the postdoctoral fellowship.
2. It **boosts research into pressing and complex social and scientific questions**, such as: public health and health inequalities, Indigenous reconciliation and justice, civic participation and democratic engagement, data growth and privacy protection, trust in institutions, climate change and sustainability, migration and refugee displacement, income inequality, racial injustice, and food and housing insecurity.

M3C Fellows work under the direct **supervision** of a McGill faculty member with expertise in the Fellow's program of study. In addition, M3C Fellows are assigned **two mentors**: one internal and one external. The internal mentor is a member of McGill tenure-track or tenured faculty (who is not the supervisor). The external mentor is a professional in the community or industry. Mentors will be identified and matched based on the Fellow's goals, interests, experiences, and expressed preferences. Between the supervisor and mentors, the **M3C Fellows will have a strong scaffolding** to support their research success, the pursuit of their personal and professional goals, and overall wellbeing.

A M3C Fellowship **term is one year, renewable once**, depending on the Fellow's progress in the first year and on recommendation of the faculty supervisor and mentors.

A M3C Fellow is awarded \$70,000 annually (plus benefits) and is granted a yearly research allowance of \$15,000. To the extent possible, a Fellow will also be granted workspace in the Faculty to which they are appointed.

Eligible candidates will have **completed all requirements for their Ph.D.** on or before August 31, 2024.

All are invited to apply by submission of the following by email to M3C@mcgill.ca:

- A letter of intent setting out proposed original research project and timeline, including the name of one or more proposed supervisors at McGill. (Maximum 2 pages)
- Resume
- A list of three names of referees who will be contacted if the candidacy is considered for the next phase in the selection process.

Submissions must be received on or before July 12, 2024, to be considered for the 2024-2025 cycle.

Selected candidates will be identified no later than August 15, 2024. Appointment as an M3C Fellow will begin in the fall or early winter terms of 2024-25, on a date mutually suitable to the selected candidate and the faculty supervisor.

More information can be found [here](#) or by contacting M3C@mcgill.ca.
